generalized actor:

Known Actors:

- System Admin
- Backoffice Operator
- Aircraft Manufacturer
- ATCC
- Maintenance Technician
- Maintenance Supervisor

USER

- Airport type
- Maintenance Template
- Aircraft Model
- Aircraft
- Airport
- Airplane certification
- Fleet ? US 236 — are these the same ?
- Network ? US 245 — US249 too
- Maintenance Cost Report
- Aircraft Type ? US 221
- Maintenance Part

Aircraft Model:

- → manufacturer
- → model name
- → seating capacity
- → fuel capacity
- → max range
- → cruising speed

Aircraft:

- → registration number
- → Model
- → manufacturing date
- → status [active, inactive, under maintenance]
- → due for maintenance (calculated) (details here, US 222)
- → features (string[]) (wi-fi, specific engine type ??? US224)

Airport:

- → IATA code
- → name
- → city
- → country
- → timezone
- → coordinates
- → runway information [name, length, orientation]
- → status [operational, closed, under maintenance]
- → photos (optional, string[])
- → detailed facilities information (optional ?, string or dict?) [terminals, gates, services]
- → operational hours
- → contact information

Flight Route: (factored (history))

- → origin airport → must exist
- → destination airport → must exist
- → estimated flight time
- → aircraft requirements [range, capacity]
- → identifier (US 13)

Aircraft Maintenance Record:

- → Aircraft Registration
- → Maintenance type [according to maintenance template]
- → description
- → Start Date
- → expected duration
- → checklist [defined by maintenance template]
- → maintenance component [engine, airframe, avionics, interior, exterior]

Maintenance Template

- → template name
- → template type [inspection, scheduled maintenance, overhaul, modification]
- → applicable aircraft models
- → checklist

Maintenance Part: (details here US 226)

- → model number
- → stock
- → name / description

Scheduled Flight: (created by the assignment of an aircraft to a flight route)

- → departure
- → status (?)

⇒ N → 1 ← N

Maintenance Cost Report:

- → aircraft (or aircraft. model)
- → average turnaround time (per aircraft type) (links to aircraft type US221)
